Scheduling for your office, and everything in it

Robin is one easy place to coordinate meeting spaces, people, and things in your office. Complete with analytics and insights that uncover usage and help optimize space.

Robin works everywhere you do

Supports Google, Office 365 and Exchange 2007+. Available on web, mobile and tablet (Android or iOS). Calendar plugins for Google, Office365 and Outlook.

Find and book the right room, with the right things, at the right time

Search your entire office for just the room you need when you need it. Use filters like availability, amenities, capacity, and room type.

Get personalized notifications and room recommendations

Robin mobiles apps notify you to keep tabs on your own schedule. Place Bluetooth beacons in your rooms to enable automatic check-ins, proximity-based alerts, and real-time occupancy detection.

Remove the 21% of meetings that get abandoned on the calendar

Check-ins confirm the meeting took place. If nobody shows up, the room is automatically unbooked, and the calendar gets freed up.

Power your office with data, not guesses

Over 95 KPIs help uncover workplace usage, including: popular rooms, equipment, and average meeting length and attendee count.

Thousands of company schedules, powered by Robin

" SONOS

"We never had a way to gauge how many meetings were being booked or which parts of the office and office space types were being used most often. With Robin, we do."

Johny Jacques, Sonos
