

A better way to manage your meeting rooms

Robin is a search and scheduling engine for your office -- find and book rooms based on the stuff you need, remove no-show meetings automatically, and get reports on how the office is actually being used.

Works with what you have

Syncs with your calendars in Google, Office 365, and Exchange. Runs on Android or iPad tablets.

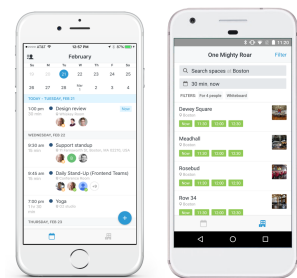

Find the right room

Search your entire office for just the room you need when you need it. Use filters like time, date, amenities, capacity and room type.

Stop no-show meetings

Stop no-shows by requiring meeting check-ins. Book the room, see the schedule, or report issues right from the display.

Mobile booking

One place to manage your schedule, designed to help you both in and out of the workplace. Available on both iOS and Android.

Office analytics

Robin's office analytics bring together the usage, calendar, and occupancy data you need to make better decisions.

Presence sensing

Robin works with Bluetooth beacons, allowing accurate, real-time occupancy, improved analytics, and automatic check-ins.
